Work Experience

Sep'25-Present | Senior Manager | CK Birla Group

- Evaluating 20+ CRM platforms and developing business cases for enterprise-wide system selection and cost optimization.
- Built financial models delivering ₹18.75L savings on a ₹3.75 Cr investment with payback in under 6 months.
- Owned a 2-year roadmap, prioritizing 40+ initiatives across AI, CRM, and enterprise transformation programs.
- Designed CRM-SAP API integrations, reducing turnaround time for workflows handling ~₹8 Cr monthly transactions.
- Assessed 270+ AI use cases and identified high-ROI opportunities for enterprise adoption.
- Delivered AI automation and agentic AI solutions (Alsera/OpenAI), reducing process time by up to 50% and improving issue resolution speed by 35%.

Sep'21-May'23 | Programmer Analyst | Cognizant

- Managed backlog prioritization and sprint execution for an 8-member agile team, achieving 95% on-time delivery across releases.
- Defined and delivered 120+ business requirements/user stories across 4 releases for enterprise insurance platforms.
- Partnered with 30+ business and technology stakeholders, accelerating feature delivery timelines by 15%.
- Leveraged SQL-driven insights and performance analysis to improve customer experience, increasing CSAT to 90%.
- Contributed to enterprise transformation initiatives generating \$16M+ business impact while supporting cloud migration and scalability programs.

Internship

Product Intern- Audit Management Portal | Cognizant

5 Months

- Gathered and translated stakeholder needs into product requirements, workflows, and functional specifications for an audit management platform, ensuring alignment between business objectives and delivery teams.
- Coordinated a 4-member cross-functional team to drive end-to-end execution, leveraging structured planning, stakeholder communication, and milestone tracking to ensure timely delivery.

Research Intern- Wealth Bridge Capital | Cognizant

2 Months

- Conducted industry research, market intelligence, and competitive benchmarking to uncover investment opportunities and identify ~15% growth potential across target segments.
- Developed data-driven evaluation frameworks and analytical models, improving investment assessment speed by 20% and decision accuracy by 15%.

Projects

HandScan (0 → 1 Product)

2 weeks

- Identified a user need for real-time handwriting digitization and translated insights into product requirements, leading the development of a 0→1 mobile application using Kotlin.
- Defined latency and recognition accuracy as key success metrics, optimizing the processing pipeline to achieve 2.5-second response time and 80% recognition accuracy.

Product Growth & GTM Strategy (US & Canada)

8 weeks

- Formulated a market entry and expansion strategy for the \$4B US baking industry, leveraging market sizing, competitive analysis, and opportunity assessment to identify ~15% market-share potential.
- Designed an omni-channel go-to-market strategy for US and Canada expansion, optimizing a \$50K acquisition budget and forecasting 20% e-commerce growth within six months through cross-functional execution planning.
